Objective

Seeking a role as a React.js Developer in a dynamic team where I can enhance my knowledge of frontend technologies, write clean and reusable code, and build user-friendly interfaces using React, TypeScript, and REST APIs.

Experience

- **Poliarc Services Pvt Ltd** 21 July, 2025 -
Frontend Reactjs Developer
I am currently working as a Reactjs Developer at Poliarc Services Pvt. Ltd., where I contribute to building election and political management software solutions. My work involves developing features for campaign tracking, voter management, group communication, and social media management, aimed at enhancing coordination, engagement, and data-driven decision-making for political organizations.

Education

- **Maharishi University of information technology, lucknow** 2022-2024
MCA
72.5%
- **Patliputra University** 2019-2022
BSC

Skills

- HTML, CSS, Tailwind CSS, Bootstrap
- Reactjs, Nextjs
- Javascript, Typescript
- Redux, mui, validations
- Git, Github
- Backend Api Connection with frontend using Redux

Projects

- <https://maharishivedvyas.org/>
A vibrant, compassionate web-platform for My Aashiyana Foundation, showcasing the organisation's mission to rescue, care for and rehabilitate a diverse array of animals—ranging from cows and dogs to monkeys and other strays. The front-end is developed in React with Tailwind CSS for responsive, accessible and visually-engaging interfaces (animal galleries, “adopt/sponsor” modules, donation call-to-action). The back-end uses Node.js/Express to power APIs (animal profiles, adoption status, donation tracking, volunteer signup), and MongoDB for flexible data storage of animals, donors, volunteers and content. The site allows visitors to explore rescue stories, view live updates, submit support inquiries, and facilitates foundation administrators with content management and analytics. Seamless mobile and desktop experience, optimised performance, and easy future scaling for new species, regions or campaigns.
- <https://thengoguru.com/>
TheNGOGuru is a digital platform designed to empower NGOs and non-profit organizations by providing them with comprehensive online solutions and strategic consultancy. The platform offers end-to-end services including NGO registration assistance, website development, digital branding, funding alerts, and ongoing virtual consultancy
- <https://bhagwatbhawan.in/>
A modern, responsive website for Bhagwat Bhawan (Mathura) built with React and Tailwind CSS for

the front-end, Node.js + Express for the back-end API, and MongoDB for data storage. The site features room listings, availability status, online booking enquiry, photo gallery, guest reviews, and an admin dashboard for managing bookings and content. It's optimized for mobile and desktop, with intuitive navigation, fast performance, and easy content updates for the hotel management.

Personal Details

- Date of Birth : 13/12/2001
- Marital Status : Single
- Nationality : Indian
- Gender : Male
